

How to Generate an Observer Pairing Code from the Student Canvas App

Students can generate pairing codes for parents/guardians from the Settings section of the Student Canvas app.

1. The settings section can be found by tapping on the **three horizontal lines** of the Canvas app that appear in the upper left-hand corner of the Dashboard view and tapping **'Setting'** in the menu that appears.

2. Tapping on **'Pair with Observer'** will initiate a pairing code to be created that is valid for 7 days or one valid use. If a code expires, a new one can always be regenerated using the same steps.

3. The code then will need to be shared with the parent/guardian setting up the Observer account in order to link with the student appropriately in Canvas.
