Principal

Mantoux Tuberculin Test

To all new employees:

Mantoux intradermal tuberculosis testing is required upon employment.

All newly hired employees (full-time and part-time), substitute teachers, student teachers, school bus driver and any other person, including volunteers (over 20 hours per month) who have contact with pupils are required to have documentation of a Mantoux test administered within the preceding six months.

An employee transferring between school districts or a non-public school within New Jersey does not have to be tuberculin tested if there is a documented record of Mantoux skin test, or preventative treatment previously administered.

Please submit your Mantoux documentation to the health office on the first day of school/employment for verification and filing.

Name: _____
