

Summer Resources List

You've worked so hard this year building your skills and knowledge, it would be a shame to let that go to waste! Research shows that it is extremely important to keep up with some things over the summer to combat the dreaded "summer slide" and loss of skills and fluency. Below is a list of some suggestions, activities, and apps that can be used throughout the summer to stay sharp and make sure you're ready for fifth grade. We recommend that all IXL levels are at 500 when starting fifth grade. This helps make sure you are ready to rock and roll starting in September. If you would like more information, resources, or help with login information we are always just an email away.
